The FAA Safety Team presents:

Wheres the Pilot - An Overview of UAS Research Activities at HAI HELI-EXPO 2016

Learn about the latest developments in the integration of unmanned aircraft systems (UAS) into the National Airspace System (NAS). The FAA continues to move aggressively toward the safe, timely, and efficient integration of UAS into the NAS, while maintaining the highest level of safety among disparate operations, including rotorcraft. This session will showcase UAS research activities and how they support the FAA's goals of accommodation with all airspace users, especially those within the helicopter community, as well as the numerous obstacles that still exist for implementing this technology within the NAS.

This course is offered at the HAI Rotor Safety Challenge at HELI-EXPO 2016. These sessions are FREE to all HELI-EXPO 2016 registered attendees and exhibitors.

Attend at least six Rotor Safety Challenge sessions at HELI-EXPO 2016 and receive a certificate of recognition for completing the 2016 HAI Rotor Safety Challenge.

Take the Safety Challenge in three simple steps:

1. Select safety sessions to attend from the HAI
Rotor Safety Challenge Schedule. To see the full

Safety Challenge schedule, visit

http://www.rotor.com/takethechallenge.

2. At the conclusion of each session, receive an
